Dear Customer, we value the trust of our customers and strive to make their use of Microsoft products as efficient as possible. In this regard, we have prepared an analytical report on the state of your Tenant. Please take a look

Common information

Owner Name	Address Street, City, State (Province), ZIP (Postal co)	Customer primary contact Name Surname, email
Default domain name	Tenant registration MM/DD/YYYY	Microsoft ID
Tenant users, qty	Subscriptions, qty	Azure licenses, qty
		Tenant type
		Total cost of all sub

Tenant security information

Revealed pattern name	
<u>This block describes the identified risk factors that can harm the safety of the tenant.</u>	Here are recommendations that can neutralize or reduce the threat to the safety of the tenant.
Security defaults status	
<u>Pay attention, your current Security defaults status is 'inactive'.</u>	To prevent fraudulent activities and protect the tenant, we recommend enabling this service. Expected effect of implementation is preventing growth of unexpected costs and preventing tenant data leakage

Subscription usage information

Revealed pattern name	
<u>This block analyzes the efficiency and completeness of subscription usage by the client's users. The analysis is carried out on the basis of rules that describe the logic of its implementation and the development of recommendations.</u>	Here are recommendations aimed at optimizing the use of subscriptions.
90+ days blocked users with assigned licenses	
<u>X out of Y users with 'blocked' status for 90+ days have N of assigned licenses.</u>	<p>Please check the relevance of user statuses. Possible solutions:</p> <ul style="list-style-type: none"> • if the status of a user from the list does not change, we recommend canceling the licenses assigned to him/her or reassigning them to other users; • if the user status is not relevant, we recommend updating it.
