Test Task for UI / UX Designer

1. Provide 3 - 4 user personas
2. Provide a User Journey & Flow Map (High Level)
3. Provide an Emotional Journey for the user
4. Provide Basic Wireframes for the App
5. Do 4 - 5 relevant screens with the UI you see fit for the app
6. Do a 1 Page with arguments why chose one way to approach the task solving and not something else. Please mention what were you most difficult points in doing this job.
7. Write a small Design Specs Documents for the app
8. Bonus: do the animation in Adobe XD or Principle or any other software to show the most gorgeous interaction

Format : Sketch / Adobe XD

Deadlin: 14 days from the day you receive the task

App Scenarios (choose 1 of them)
Please note that you are free to interpret the short scenario as you desire. Your imagination and possible features are welcome.

A. You need to create an app for an eyelash & brows salon for me (the client) to book my appointments, manage my discounts and payments.

_____

B. You need to create the app that will allow me to check upon my car's indicators, when the next checkup is needed, when I need to buy / change my tires / my car SPA's etc..
